

TEJASWINI SARIKONDA

Boston | +1 (617) 212-9759 | sarikonda.t@northeastern.edu | [LinkedIn](#) | [Kaggle](#) | [GitHub](#)

SKILLS & EXPERTISE

Languages:	Java, Python, SQL
Databases:	MySQL
AI/ ML:	Regression models, Classification models, NLP
Visualization:	Power BI, Tableau
Analytics:	Marketing Mix Modelling (MMM), Consumer Analytics
Cloud:	AWS (S3, EC2, Lambda, RDS, DynamoDB)

WORK EXPERIENCE

KANTAR | Senior Business Analyst | Data Strategy & Engineering Bengaluru, India | Feb 2022 – Dec 2025

- Built and shipped production ML pipelines in Python for Marketing Mix Modelling across 50+ FMCG categories and 15+ global markets, generating 3–10 year forecasts that informed pricing, distribution, and media investment decisions for Fortune 500 clients.
- Engineered multivariate regression and ensemble models (Random Forest, Decision Trees, Gradient Boosting) on 10+ feature pipelines integrating pricing, distribution, media spend, and macroeconomic signals; validated through statistical diagnostics and elasticity constraints to ensure model reliability in production.
- Developed a client-facing simulator tool that served real-time forecasts and scenario predictions to marketing and strategy stakeholders, transforming offline models into an interactive decision-support product.
- Designed reusable Python automation frameworks and templates that reduced model delivery time and processing errors by 40%, standardizing the modelling workflow across the global forecasting team.
- Recognized with the Rise Team Spark Award 2024 for engineering contributions to Unilever's global Homecare forecasting program; led pilot ML delivery for Kantar's Middle East market entry (GoodyCo, Saudi Arabia).

WIPRO | Project Engineer | QA Testing Bengaluru, India | Mar 2017 – Mar 2019

Skills: Salesforce, Manual Testing

- Experienced in manual software testing with a strong understanding of test planning, design, execution, and defect tracking. Translated business requirements into effective test scenarios and cases using structured design techniques. Involved in all phases of the testing lifecycle, including requirement analysis, test case development, execution, and bug reporting. Led a team of two testers in conducting unit testing across mobile and web interfaces, ensuring quality and functionality of client-facing platforms.

EDUCATION

Northeastern University, Boston, MA Jan 2026 – Present

Master of Science in Computer Science

Jawaharlal Nehru Technological University, Anantapur, India Jun – 2016

Bachelor of Technology in Electronics and Communication Engineering

CERTIFICATIONS

Advanced Certificate in Data Science Dec – 2024

International Institute of Information Technology Bangalore (IIITB), India

Post Graduate Diploma in Data Science Feb – 2022

Manipal Academy of Higher Education, Bangalore, India

PROJECTS

Future Sales Prediction ([Link](#))

Built a Regression model using Linear Regression, Decision Tree, Gradient Boost, and Random Forest algorithms to forecast the total sales for every product and store in the next month. Achieved RMSE score of 1.2987 with the Gradient Boost model (the best RMSE score on this dataset in Kaggle is 0.7536).

Stroke Prediction ([Link](#))

Built a Classification model to predict whether a patient is likely to get a stroke or not.

Countries for HELP International ([Link](#))

Built an unsupervised model to cluster the countries that are in direct need of aid.
